About Us

The London Academy of Trading (LAT) is an established and trusted provider of financial trading education. We deliver courses both at our City of London campus and online to more than 500 students per year.

LAT's courses cover all aspects of trading, including fundamental and technical analysis, risk management and trading psychology. We combine face-to-face and online lectures with live webinars and practical mentored trading sessions to enable students to apply learned knowledge to real-time financial markets.

LAT are pioneers in this field being the first UK Training Academy to provide accredited and regulated qualifications in Financial Markets Trading.

Partnerships with respected academic institutions and global retail brokers

Accredited ABE Level 5 Diploma in Applied Financial Trading (regulated by Ofqual)

Students from more than 50 countries have learned to trade at our London campus

LAT's campus is situated in the heart of the City of London's Financial District

London Academy

Level 5 Diploma in Applied Financial Trading

MODE OF ATTENDANCE

On campus, online or
blended

COURSE DURATION

12 weeks

BENEFITS

- Obtain a recognised qualification in Financial Trading
- Enhance your CV if looking to move in to the industry
- Learn fundamental and technical analysis skills
- Manage and trade your own portfolio
- Study around existing commitments with our flexible schedules

SUMMARY

The Level5 Diploma is our premier accredited and regulated course. It has been designed to provide students with a comprehensive understanding of how different trading techniques are used in real life situations by financial market professionals, including theoretical and practical modules on our City trading floor. It is an ideal course for people with a desire to become financial markets traders or enhance their current income through trading but with little or no previous knowledge of trading.

The course begins with an introduction to financial markets and an outline of the basics of trading. The study of price action in financial markets incorporates all available information; fundamental, political, behavioural and macroeconomic. Fundamental news and political events are the cause of most significant market moves, so macroeconomic events and their significance are discussed on an unfolding and real-time basis.

Technical analysis is also a major driver of financial markets, therefore the course provides detailed explanations of technical analysis tools and explains how these trading techniques can be combined to build robust and profitable trading strategies. There is also strong emphasis given to trading psychology and how the natural human emotions of hope, fear, greed and over-confidence can adversely affect your trading decisions.

BONUS OFFERING FROM OUR CORPORATE PARTNERS

In addition to the academic content and interactive mentoring, all delegates will receive access to tight institutional spreads for live trading accounts (our business model is NOT to take any rebates or commissions from our brokers, so we can offer the tightest spreads possible).

COURSE OUTLINE

Successful trading requires a deep understanding of:

- **Fundamental Analysis**
- **Trading psychology**
- **Political and macroeconomic news**
- **Risk management**
- **Technical analysis**

The 12-week course has been structured to provide you with all the tools and information you need to learn the required trading skills and apply them to create a structured trade plan.

Twelve weeks unlimited access to our Interactive platform:

- **Online HD pre-recorded video lectures**
- **Comprehensive course reference manuals**
- **Detailed answers to frequently asked questions (FAQs)**
- **Online chat and discussion forums**
- **Ten hours a day of direct access to our mentors via online chat, phone, Skype, email, etc.**

On-site access to the LAT trading floor (you choose how many weeks):

- **Your own dedicated dual-screen trading desk**
- **Constant access to professional traders and mentors for advice and guidance**

Full-time access to a real-time trading platform:

- **Trade foreign exchange, precious metals, commodities and stock indices**
- **Apply learned knowledge and trading techniques to real-time markets**

Twenty weeks access to our three webinars each day 07.15, 12.00 and 16.30 (London time each day)

- **Listen to the professionals and ask questions in these daily Q&A sessions**
- **Watch the professionals check overnight market activity and analyse today's significant macro and political news events to prepare for the day ahead**
- **Identify potential trading opportunities both intraday and longer term**
- **Webinar recordings will be made available soon after each event in case you can't attend live or want to review the webinar later**

Trading Bootcamp

MODE OF ATTENDANCE

On campus, online or
blended

COURSE DURATION

2 weeks

BENEFITS

- Quick and convenient introduction to financial markets and trading
- Useful taster to understand the concepts and practicalities of trading

SUMMARY

The ideal introduction to the financial markets, these courses combine academic teaching with extensive practical trading sessions as delegates are taught how technical, fundamental and behavioural analysis can help aid better trading decisions.

Academic sessions include:

- Discussing how political and macroeconomic news affects market prices
- Introducing techniques to study charts and analyse price action
- Discussing trading psychology and risk management

Practical trading sessions on the LAT trading floor include:

- Applying learned knowledge to real-time markets
- Executing real-time trades on a professional trading platform
- Receiving hands-on advice and guidance from our experienced mentoring team

Formal assessments are not included in these courses, but can be arranged if required.

BONUS OFFERINGS FROM OUR CORPORATE PARTNERS

All delegates who complete this course will also qualify to receive our package of free bonus offerings from our corporate partners:

- Up to one month free access to the LAT daily webinars
- Free demo trading account with no expiry date

COURSE OUTLINE

Depending on the length of the course, each day combines academic lectures with mentored trading sessions:

Identifying a strategic approach to trading

- **Explanation of how to trade FX and commodities**
- **Fundamental and Economic Analysis**
 - » **How and why this affects the markets**
 - » **Checking daily macroeconomic news**
- **How to prepare your day as a trader**
- **Whether to take a Fundamental or Technical approach?**
- **Identifying a trade from conception to execution: timeframe analysis**
- **Risk management and lot sizing**

Analysing price action

- **Identifying price action around major market levels – support, resistance, trends and channels**
- **Recognisable price patterns and how to trade them**
- **Using Fibonacci analysis to identify trading zones and targets**

Setting targets and applying stop losses

- **What are we trying to achieve from the markets?**
- **Are our price targets realistic?**
- **Reasons for setting stop loss levels**

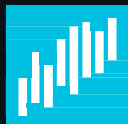

Understanding your emotions

- **Trading psychology**
- **Understanding biases and how to manage them**
- **Managing emotions when holding winning or losing positions**

Practical trading sessions

- **Applying learned knowledge on a live trading platform**
- **Constantly monitoring markets for potential trading opportunities**
- **Using macroeconomic indicators to generate trade ideas**
- **Keeping a record of trades completed**

Assessments (if required)

**London Academy
of Trading**

The London Academy of Trading (LAT) is a privately-owned educator based in the City of London. LAT provides accredited, vocational programmes in financial markets trading.

LAT prides itself on being the most trusted provider of trading skills education, putting students' needs first in everything we do. LAT offers courses for individuals looking to develop their understanding and experience of financial markets trading with a view to earning additional income through trading, or enhancing their career opportunities.

Our courses combine theoretical teaching with practical trading experience under the watchful eyes of our team of professional traders and mentors.

Our courses can be studied on-campus, online, or a blended combination of both. Working in partnership with a number of financial partners enables us to provide cutting-edge technology and up-to-the-minute news and data to support the learning process.

Tecnología Financiera

Tecnología Financiera is a company specialized in the area of financial services, established at the end of 2011 in Venezuela. Focused on the Latin American market, the firm has carried out a wide range of projects at national and international level, always prioritizing to provide its clients the best education and consulting services.

By the virtue of its programs of courses and diplomas, always through a practical and results oriented vision, the company covers the areas of Trading & Investment and Corporate Finance, as well as being differentiated from the others finance schools in Venezuela for the reason that is the only one that offers the career of Trader & Investor to their students.

Tecnología Financiera also, through forums, bootcamps, talks and diverse events, is permanently in the search to bring the world of finance closer to the public, and to the university environment specially with the more prestigious institutions and universities such as the Universidad Metropolitana and Universidad Católica Andrés Bello, where the professors of the firm also belong. Through its financial services unit, the firm specializes in the area of investment fund management and corporate services, making sure to deliver attractive returns to its clients tied to the most rigorous and professional risk management, adapted to the needs of its clients.

Tecnología Financiera operates in the city of Caracas, but keeps several relations with international associates.
